Overview

QQ: 749389476

<https://tutorcs.com>

This unit builds upon FIT1041 and FIT2083 or FIT2084 and allows students to conduct an independent research project. Students will be assigned to one of the Faculty of Information Technology's research groups, an academic supervisor and a research topic. Students may work on their project individually or in groups, as determined by their supervisor. During the semester, the student will be required to participate in research group events including seminars and presentations.

Learning outcomes

On successful completion of the module, you should be able to:

1. Participate as a member of a research group;
2. Demonstrate how to conduct IT research;
3. Critically analyse and assess previous approaches to solve a particular research problem;
4. Formulate a research hypothesis and choose an appropriate methodology to evaluate that hypothesis;
5. Conduct the experiment and/or implementation in order to evaluate the hypothesis;
6. Demonstrate the ability to effectively communicate their research findings both orally and in writing.
